ISHINE – QUEENSLAND PROJECTS

DRILLING UPDATE

On 11th November 2010, Ishine International Resources Ltd (**ASX: ISH, 'Ishine' or 'Company'**) announced that the Company was undertaking an RC drilling program at its Mt Watson Copper Joint Venture (JV) Project and was planning a single diamond drill hole for its Boomarra Joint Venture (JV) Project. The Company is now pleased to provide the market with an update on its operation in these two JV projects.

The RC drilling at the Mt Watson Copper Project has recently completed its field work. A total of 11 holes were drilled for 1,199 metres. Drilling samples have been sent to lab for assay with results being expected to be available in early 2011.

A diamond drilling program at the Boomarra JV Project has commenced, but the operation was suspended early this week due to heavy rain fall. A total of 602 metres were drilled. The company is currently undertaking a technical review of the core. Part of the core will be assayed and further drilling of this hole will resume after the wet season.
